SUMMARY

In the past five years as a software developer, I have focused on using my analytical thinking and problem-solving skills in data science. The careful and organized work habits I developed in software development now help me find valuable insights in data. I enjoy teamwork and always aim to help the team reach our common goals. I am eager to learn new skills and improve myself. I work on different projects on Kaggle and write articles on data science on Medium. My goal is to keep building my skills and grow in this field.

WORK EXPERIENCE

IFS , Kocaeli / GEBZE

Apr 2021 – Present

- Developed software solutions using tools like C#, PL/SQL, Oracle, and IFS Developer Studio to meet customer needs and follow legal requirements.
- Worked with version control systems, such as SVN, to keep projects up-to-date and allow teamwork.
- Prepared accounting and finance reports with SQL based on customer requests.

Miceman , Antalya / KONYAALTI

Apr 2019 - May 2020

- This was a part-time job I held while I was a student
- Managed operational processes such as logistical planning, participant registration, and event day coordination.
- Developed operational strategies to enhance customer relationship management and participant satisfaction.

SKILLS

Python, SQL, Data Analysis and Manipulation, Machine Learning, Data Mining, C#, Oracle (PLSQL-Triggers- Stored Procedures)

EDUCATION

Aug 2017 - Aug 2021

Akdeniz University

B.Sc. in Management Information Systems

GPA: 3.06

ADDITIONAL INFORMATION

- **Interests & Hobbies:** Boxing, 3D Printing, Arduino, Robotics, Chess, Camping
